

## Interactive Platform for Reporting Training

### Flexible

The number of exercises or exams to take for each session can be chosen by the instructor.

### Automatic

Once the user submits the answers, the system presents the automatic correction.

### Web Based

i-Reporting™ is a Web Application, so it is always available on the web with no need for extra software.

- 1 Each user, either learner or an instructor, logs in with his username and password and decides on which courses operate.
- 2 The number of exercises or exams to take for each session can be chosen by the instructor.
- 3 Once the user submits the answers, the system displays the automatic correction.
- 4 At the end of the session, it is possible to see the overall rating of the participants or the individual user.

The **i-Reporting™** platform enables interactive reporting of BGA and ECG exams in a simple, interactive and automatic way. The platform is based on Moodle, a computing environment internationally used for e-learning courses management.

### i-Reporting™ includes:

- i-Reporting™ software installed by Accurate on the customer's moodle server
- User manual
- Installation support and remote training
- Lifetime free software updates and upgrades
